Building and Code Report for February 2026

Another slow month with only 3 permits issued.

- 1) 1 manufactured home
- 2) 1 driveway permit
- 3) 1 wood stove installation.

We issued 3 property maintenance violations with limited success. Plans are to actively push some of these violations to the next level of enforcement.

One violation was issued for construction without a building permit.

One violation was issued for an illegal residence. It was brought to our attention that a travel trailer being used as a permanent residence in a residential zoned area.

I've been taking advantage of this slow period to attend some of the yearly in service training and recertification. Most classes to date have concentrated on the new 2024 changes in the NYS Building Code. Eventually, the township will have to adopt a new local law to address future code enforcement.

There has been some activity in the office concerning a few of the major projects in the township.
