March 30, 2026

Building and Code Report for March 2026

Activity has been increasing as the weather starts to cooperate. Six building permits were issued for the month.

- 1) Demolition of existing 2 family residence
- 2) Seasonal pavilion
- 3) Pole barn
- 4) 1 permit renewal for single family residence
- 5) 1 new single family residence
- 6) 1 deck

We are still issuing property maintenance violations with some degree of compliance. In the past, if some degree of compliance was achieved, we have stopped or suspended action. My present plans are if the violation is still present or not substantially rectified, the violation will proceed to court to be followed by fines as warranted. A building permit has been issued to the violation that was severed in February.

I've taken advantage of the slow period and have attended the yearly refresher and training that is mandated.

We're conducting inspections on any open building permits as warranted. Been working with several entities on projects that have not yet been proposed but may be in the planning stages.
