Code Department Report, May 2026

Seeing an increase in activity this month. Construction and inspections on open building permits have increased steadily. A total of 13 permits were issued during the month.

- 1 garage conversion
- 3 permit renewals
- 1 single family home
- 2 roofing projects
- 1 shed
- 2 demolition projects
- 1 pole barn
- 1 seasonal home renovation
- 1 deck

Moving ahead with several property maintenance compliance violations. Several owners have made significant progress, while a few others are offering resistance. One parcel has a history with the same issues. They were actually taken to court by the township in 2002-2005 with minimal compliance. Another was in court back in 2014. Portions of the original violation were partially remedied but others persist. I've been working with council to try and develop a plan to address several other parcels.

I've worked with the planning department with several other proposed projects. The first commercial solar project being one of them. We are also starting to address several items that need clarification in our existing town code.
